

OMNI

3-in-1 Cable Sensor System

ONE CABLE COMPLETE CONTROL

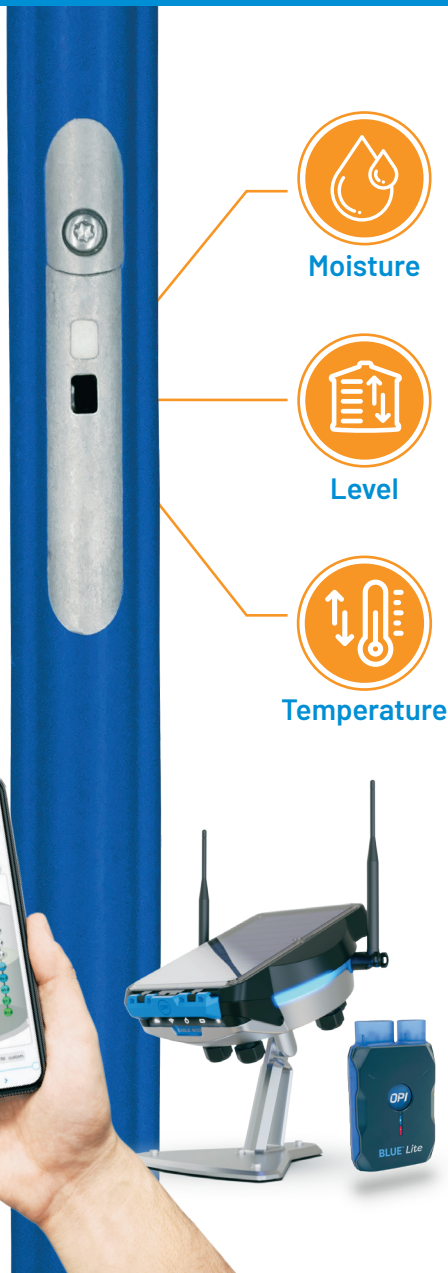

OMNI delivers the inventory, moisture, and temperature data you need to protect your harvest and make better decisions. Best of all, it provides these capabilities at no additional cost compared to moisture-only systems.

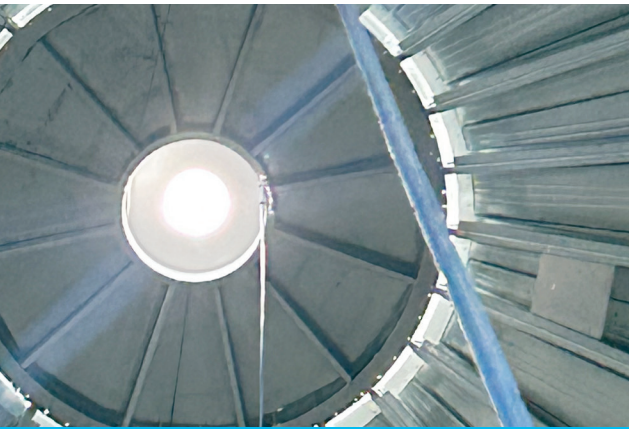

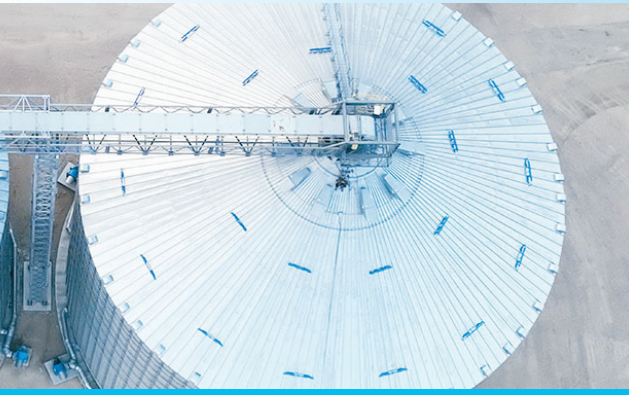

Benefits

- Lower operational and implementation costs
- Problem area detection
- Reliable performance year-round, in any condition
- Safer storage, maintenance-free
- Comprehensive data in one view

Features:

- 3-in-1 sensing for grain inventory level, temperature, and moisture
- Near-instant level detection on line-powered systems, hourly on solar powered systems
- High dust-resistant optical window and sealed construction
- Designed for harsh conditions from -40°F (-40°C) to $+140^{\circ}\text{F}$ (60°C)
- Seamless integration with EPIQ, BLUE Lite, and managegrain.com
- Patent-pending solid-state technology with no moving parts
- View potential grain bridging or gaps based on sensor positioning

Engineering You Can Trust

With OMNI, operators receive dependable, precise readings regardless of fan activity, weather patterns, or bin conditions. Purpose-built algorithms and robust hardware make this cable a major step forward for grain safety and inventory accuracy.

Deploy these advantages:

- Accurate inventory and grain-level readings
- Detection of structural anomalies before they become hazards
- Conversion of data into usable grain volume and load capacity
- Durable housing built for heavy grain loads and all commodity types
- Remote access to every reading from desktop, tablet, or mobile

Improving Every Operation

The OMNI Cable brings clarity and control to grain storage by reducing manual checks, improving safety, and giving operators complete visibility into every layer of grain inside the bin. These benefits speak for themselves:

- Lower implementation cost combining three tools into one
- Faster operations with fewer climbs and no manual inspections
- Better storage optimization through accurate inventory tracking
- Improved grain quality through proactive conditioning decisions
- Safer harvest and storage practices with fewer exposure risks

The OPI Difference

OPI has led grain monitoring innovation for over 40 years. The OMNI Cable continues that legacy with breakthrough accuracy, rugged reliability, and one of the industry's most advanced platforms. For growers and commercial operators seeking a smarter, safer, and more efficient way to manage grain, OMNI delivers unmatched control and peace of mind.

ADVANCING
Grain Storage
Management

OPI OMNI is a part of the OPI system of products driven to help you maximize grain management for your operation.

This system provides options for technology at every level of comfort.

Included with OPI Grain Management Systems...

CUSTOMER SUPPORT

Trust our Team. OPI and our dedicated partners are available to keep your system running smoothly. If technology eludes you, lean on our teams to get you up and running and troubleshoot any concerns you may have.

EDUCATION AND TRAINING

Education is key. OPI Partners provide onboarding to understand OPI OMNI, access the platform, and start assessing data. We want to help you be more efficient with your grain management practices in order to optimize the value of your stored grain.
